

Petroleum Engineering

From thermo-hydraulics to geomechanics to intelligent systems, the petroleum engineer must have a thorough understanding of the variables and essentials of hydrocarbon recovery from subsurface reservoirs. With the diverse environmental factors that influence well engineering, lift systems, and drilling, this vital function within the oil and gas market is crucial to economic feasibility and success. More now than ever, our world depends on oil and gas - and the need for engineers with the right talent, expertise, and knowledge of this intricate function is rising.

The **Ropella Petroleum Engineering Team**

understands the unique recruitment challenges faced by this wide-ranging industry. Our understanding of your company, your customers and current industry trends means we can find just the right fit, quickly and efficiently. Our Executive Search Consultants are likely members of the same trade associations and attend the same events as you and potential candidates for your company.

We have proven our ability to help companies grow and prosper by developing their most important competitive advantage - talented people. You can count on us to find the right talent to drive your business forward.
