

Process Engineering

Whether optimizing, designing, or controlling processes for a wide variety of industries - from chemical to biotechnology to mineral processing - process engineering can make or break a company. Regardless of the industry served, process design, control, and operations are vital to understanding and implementing new technologies and products. Finding the right professionals who understand the systemization of computer-based models and methods is crucial, and the demand for such talent is on the rise.

The **Ropella Process Engineering Team** understands the unique recruitment challenges faced by this wide-ranging industry. Our understanding of your company, your customers and current industry trends means we can find just the right fit, quickly and efficiently. Our Executive Search Consultants are likely members of the same trade associations and attend the same events as you and potential candidates for your company.

Look for our articles in *Process Engineering* and other industry publications.

We have proven our ability to help companies grow and prosper by developing their most important competitive advantage - talented people. You can count on us to find the right talent to drive your business forward.
