Systems Design Engineering

No matter the strategies, procedures, or techniques involved in engineering a project or product, it is the Systems Design Engineers who can analyze, create, and systematize the entire life cycle and value chain of a project and product. Technology has become more and more complex, and the approaches and fields for addressing these systems are becoming more important. By providing a systems (or holistic) view of the development effort, systems engineering unites the technical contributors into a team effort, forming a structured development process that proceeds from concept to delivery.

Ropella understands the unique recruitment challenges faced by this diverse industry. Our understanding of your company, your customers and current industry trends means our executive search consultants can find just the right fit, quickly and efficiently. As talent acquisition experts, we excel at attracting, recruiting and building relationships with the best minds in the industry.

Look for our articles in *Printed Circuit Design* and other industry publications.

We have proven our ability to help companies grow and prosper by developing their most important competitive advantage – skilled people. Successful industry leaders count on Ropella to find the right talent to drive their business forward.

We read and write for industry publications, including:
  » Electronic Component News Magazine
  » Machine Design Magazine
  » Engineered Systems Magazine
  » Printed Circuit Design Magazine

We participate in industry associations such as:
  » Institute of Electrical and Electronics Engineers
  » Systems, Man, & Cybernetics Society
  » Institute of Industrial & Systems Engineers
  » Association of Computer Electronics and Electrical Engineers

We regularly attend industry trade shows, including:
  » IISE Annual Conference & Expo
  » Embedded Systems Conference (ESC)
  » The Applied Power Electronics Conference and Exposition (APEC)

We have served and developed relationships with leading companies in the industry, including:
  » United Technologies Corporation
  » Colmek Systems Engineering
  » Decisive Analytics Corporation
  » Environmental Systems Design, Inc
  » Schweitzer Engineering Lab., Inc.
  » Altair Engineering
  » DowDuPont
  » ENSCO, Inc.
  » Wood
  » Paragon Innovations

Ropella teams are built around the functions our clients are seeking. We have dedicated teams focused on C-suite, Sales, Marketing, R&D and Operations.

Roles filled recently include:
  » Chief Technology Officer
  » Vice President, Systems Design
  » Director, Design & Engineering
  » Engineering Design Manager
  » Principal Power Systems Design Engineer
  » Systems Design & Integration Engineering Manager
  » Senior Systems Design Engineer
